-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 16 November 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

Claim Rejections - 35 USC 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 33-41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Low et al US 3,671,497.

Low et al US 3,671,497 teach a process for making highly fluorinated polyurethanes from prepolymer isocyanates such as toluene diisocyanate, a cross linking agent such as low molecular weight poly amines, e.g. phenylene diamines, a catalyst and a solvent. See, for example, column 1 lines 65-75, column 2 lines 3-6, 15, 39-44, 72, column 4 lines 46-48.

Patentees may differ in the specific isocyanate, cross-linking agent, catalyst and solvent employed. However, the reaction components are commensurate in scope with the generic recitation of applicants, e.g. claim 33 step a). While the claimed are not specifically disclosed in the art, they do overlap with the art's disclosure. This overlap is sufficient to render the process obvious, as it is not

necessary for the art to be identical to the claimed process in every detail, but only close enough to the claimed process to lead one of skill thereto.

To use somewhat different but otherwise analogous starting materials in an otherwise known process to obtain a known product would have been obvious to one of ordinary skill in the art as the result would not have been unexpected and therefore unpatentable.

Claims 20-32 are allowed.
